ABOUT FILTREXX

Filtrexx is the leader in Sustainable BMPs for use in erosion and sediment control, stormwater management, pollutant removal, and low impact development to protect our soil, water, and environment.

green in every way™

You know our products by our signature **green**® color. But Filtrexx green is more than just a color. It represents a sustainable product, trusted by customers and regulators, that saves you money. We're **green in every way**™

Watch how at filtrexx.com/green

INDUSTRIES SERVED

- Commercial Construction & Demolition
- Homebuilding
- Oil & Gas
- Pipelines
- Power & Utility
- Solar & Wind Energy
- Municipalities
- DOT Highway & Road
- Environmental Remediation
- Industrial
- Agriculture

SUSTAINABLE & MADE IN USA

Filtrexx products use locally recycled organic materials inside of photodegradable or biodegradable mesh. Diverting these organic materials from landfills and applying them to the soil means a reduction in greenhouse gas emissions, and a lower carbon footprint for your project or site.

All Filtrexx mesh materials are manufactured in the USA. Numerous facilities around the country fill the mesh materials with local compost FilterMedia™ in order to reduce freight costs & emissions.
